# 10. Stop smoking. Smoking is not healthy for me or others around me. I want to be healthy! Second hand smoke is not healthy either. I will avoid being around people when they smoke and will ask my partner not to smoke around me. http://www.cdc. gov/features/pregnantdontsmoke/index.html ☐ Make an appointment with my doctor to talk about help for this. ☐ Find a support person or group for additional help. ☐ Check out www.BeTobaccoFree.gov and http:// smokefree.gov/ 1-800-QUIT-NOW (1-800-7848-669). 11. Stop using street drugs and prescription medicines that are not mine. Taking drugs not prescribed for me is not good for me or my baby-to-be. There are different effects depending on the drugs used. I want my baby and me to be as healthy as possible! ☐ Make an appointment with my doctor to talk about help for this. ☐ Find a support person or group for additional help. 12. Reduce my alcohol intake now, and stop drinking before trying to get pregnant. Drinking alcohol can be habit forming. Drinking alcoholic drinks when trying to get pregnant and during pregnancy can cause problems for me and my baby. I want my baby and me to be healthy and free of bad habits. http://www.cdc.gov/ncbddd/fasd/ ☐ Reduce my drinking to less than 7 drinks a week and never more than 1 on any occasion before trying to get pregnant. http://www.cnpp.udsa. gov/Publications/ DietaryGuidelines/2010/PolicyDoc/ ExecSumm.pdf. ☐ Make an appointment with my doctor to talk about help for this.

☐ Stop drinking when I start trying to get pregnant

and right away if I find myself pregnant before planned. Drinking during pregnancy can cause

birth defects. There is no known safe level of

13. Stop partner violence.

should happen to me or my family.

Your preconception health is important for you and your baby-to-be. Keep this checklist handy so that you can look at it regularly, update it, and talk with your partner and your doctor about how to best put this plan into action. Remember to take this tool with you to your appointment. Life is full of changes so make sure you update your plan regularly. Make time for yourself... Show yourself some love. Your baby will thank you for it.

Show Your Preconception Love Health

# Show Your LOVE! Steps to a Healthier me and baby-to-be!

You have thought about your goals for school, for your job or career and for your health. You have also thought about how having children fits in with those goals, and you have decided that you want to become pregnant. Your preconception (before pregnancy) health is very important and can affect the health of your future baby. By making a plan before getting pregnant and taking the time to get healthy, you can take the steps to a healthier you and babyto-be. This is a tool to help you do that.

Start by choosing your goals for this year. It is easier to focus on 2 – 3 goals. Then use the checklist below to set your plan into motion.

# Goals for a **Healthier me and** babv-to-be!

Changes in insurance plans might mean that you (and your family) are eligible for some added preventive health services, such as screening, vaccinations, contraception (birth control) and counseling, with no co-payment or deductible. To learn more talk with your health insurance company agent.

1. Plan pregnancies.					
☐ Decide which goals to meet before having children—school, work, financial.					
☐ Think about my goals for children.					
I want to havechild or children.					
want to get pregnant when I am years old.					
I want to have children years apart. (At least 18 months apart is recommended.)					
I want to finish having children when I am years old.					
☐ Talk with my partner to share my pregnancy desire and gain support for my plan.					
Select a method of birth control that is effective and fits my needs until we are ready to get pregnant.					
If I choose an IUD or implant, I don't need to do anything except get my method replaced on time (3-10 years) and talk to my provider if I have any questions or problems with my method.					
If I choose other methods, I will use my method correctly and consistently at all times and make sure that I get more supplies before I run out. I will also talk to my provider if I have any questions or problems with my method.					
I will talk with my doctor about the prescribed and over the counter medicines I am taking and which ones I					

# 2. Eat healthy foods.

need to stop or change.

Planning meals and snacks ahead of time and having the food on hand make it less likely that I will make unhealthy choices.
